<b>Office Action Summary</b>	<b>Application No.</b> 10/518,281	<b>Applicant(s)</b> YOKOTA ET AL.	
	<b>Examiner</b> William C. Joyce	<b>Art Unit</b> 3682	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

This is the First Office Action in response to the above identified patent application filed on December 15, 2004.

#### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Drawings***

2. Figure 8 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3682

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Reference 63-103017 (JP '017).

JP '017 discloses a ball bearing, comprising: an inner ring member (30) having a single raceway surface; an outer ring member (20) which is concentrically arranged with said inner ring member and has a single raceway surface corresponding to said raceway surface of said inner ring member; a plurality of balls (50) arranged between raceway surfaces of said inner ring member and said outer ring member; and a cage (40) for holding these balls, wherein said cage comprises a pocket portion for housing said balls, and an annular portion (42,43) integrally formed with this pocket portion, and wherein said annular portion of said cage is arranged between a shoulder portion of said inner ring member and a shoulder portion of said outer ring member via a clearance having a radial fine dimension.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art (AAPA) of Figure 8 in view of Japanese Reference 63-103017 (JP '017).

Applicant's admitted prior art of Figure 8 illustrates a bearing (13,14) having a single outer ring (11,12) having a pair of raceways, a single inner ring (13,14) having a pair of raceways, a plurality of balls disposed between the raceways, and a retainer for holding the balls at predetermined spacing. AAPA does not teach the retainer having an annular portion that is positioned so as to have a small clearance with a respective ring. However, it was known in the art to form a bearing having the claimed features. For example, the prior art to JP '017 illustrates a bearing having the claimed retainer, as described above. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the bearings taught by AAPA with retainers, as taught by Japanese Reference 63-103017, motivation being to prevent contaminants having a predetermined size from entering the bearing.

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the bearings of McAllister ('621), Niedermeier et al. ('560), and Takahashi ('856).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Joyce whose telephone number is (571) 272-7107. The examiner can normally be reached on Monday - Thursday 7:30-5:00.
